Claim Rejections - 35 USC § 112

Claims 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims recite “second”, “third” , etc. characteristics, which is confusing since a “first” (preceding) characteristic, has not been recited in claim 7, from which these claims depend.

Claim Rejections - 35 USC § 103

Claims 1,3,7-11 and 60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sears et al in view of Nakano et al.

Sears discloses a controller 130, door 112, input drive 120, and clutch 122. What is not shown is the flex plate type of clutch. However, such are well known as illustrated by Nakano et al. It would have been obvious to provide Sears et al with such a conventional clutch. Sears et al has back power and senses fumes, etc. Regarding the clutch failure sensor, if the clutch fails, the door falls and inherently alerts the controller.

Claims 4,12-16,19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sears et al in view of Nakano et al and further in view of Crimmins.

Crimmins discloses a fire door that incorporates position monitors, back-up power sources, obstruction sensors, audible and visual alarms, open, close, stop, test and reset buttons and modes, etc., all of which could easily be incorporated with the Sears et al door so as to fully automate the door.

Allowable Subject Matter

Claims 2 and 61 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6, 17 and 62 are allowed.

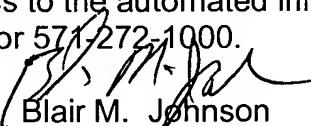

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection. The previous indication of allowable subject matter is regrettably rescinded. This action is not made final.
